

Planner Workbench to Assign Your Workforce in the Most Efficient Way Possible

Situation

- Current work scheduling processes are rigid and without transparency, making it difficult and lengthy to actually assign work.

Challenges

- Manager spends excessive time determining what skills are required for a job, what workers have those skills, and which workers are available.
- Workflow is slowed down through latency period between the time of recognizing job and the ultimate assignment of the correctly skilled worker.

Solution Innovation

- Manager is able to view entire scope of workflow, available employees, and employee skills.
- Able to view various jobs on the docket, their location, details, required skillset for completion, and edit their parameters.
- Manager can view the pool of workers and assign them to various jobs based on location, availability, and skillset.
- Able to change priority of jobs.

Users

- Management

Value Drivers

- Reduces length of work assignment process by 40%.
- Reduces latency period of workers by 60%.
- A disruptive app, pre-packaged to expedite the implementation time, ROI realization, and reduction in TCO up to 80%.
- Completely scalable technology that grows with the business.
- Fully configurable and user friendly UI from the back-end
- Multi-lingual capabilities
- Fully responsive with iOS, Android, Tablet, etc. out of the box

Industry

- Life Sciences
- Manufacturing
- Chemical
- Utilities
- Oil and Gas
