

cDashboard – Management Dashboards

Critical Business Information at CXO’s fingertips through cDashboard

Situation

- CXO level executives need real time updates on the critical business parameters when they are away from their systems. Even when online, the reports are not real-time and take valuable employee work hours to create.

Challenges

- Information around critical business parameters is currently distributed only through emails or paper based reports with undefined frequency.
- Employees are spending valuable time working on reports.
- No proactive information for pre-set conditions via reports.
- Extra data entry and spreadsheet merging is often required to generate reports.
- Getting critical information takes time and can delay the decision making process.

Solution Innovation

- Novel business offering real time updates, Cloud capabilities, and machine learning technology.
- Graphical representation of historical data, including S Curve graph.
- Input data from SAP or non-SAP source can be accepted
- Any predefined variations will send message to the mobile user.
- Pull data from process instruments using IoT and combine with data from SAP.
- Fully configurable alerts, color codes, and push notifications. Make sure you get the most important information as soon as possible.
- Quickly access different reports, view the progress of various departments, and check report history.

Users

- CXO Level Executives
- VP’s Directors
- Managers

Value Drivers

- A disruptive app, pre-packaged to expedite the implementation time, ROI realization, and reduction in TCO up to 80%.
- Completely scalable technology that grows with the business
- Push notification functionality increases usability by 50%
- 30% less time spent making graphs
- An app built with your business’s specific needs and goals in mind. Spend time and resources on adding value to your business, instead of employee hours spent making graphs and compiling reports.
- Critical business parameters have real time tracking
- Fully configurable UI from the back-end
- Multi-lingual capabilities
- Fully responsive with iOS, Android, Tablet, etc. out of the box

Industry/LoB

- All industries especially manufacturing and Power Generation
