

cInspect – Assets Inspection

Asset Inspection Made Easy Using Mobility Solution cInspect

Situation

- Managing the assets through inspection and maintenance is critical for any industry and the current paper based processes are cumbersome, adding considerable manual efforts

Challenges

- Paper based data entry during inspection process which is more prone to manual errors
- Additional efforts to enter the same data in SAP system or other backend systems
- Locating the right asset due for inspection specially in the asset heavy industries
- No validation to ensure all the inspection checkpoints are covered during physical inspection

Solution Innovation

- Fully integrates with SAP Cloud Platform
- Configurable Industry specific asset list and job details
- Complete workflow contained within app
- Novel application for the inspection of existing assets or capturing information about new ones, creating asset inventory
- Inspection Checklist customizable to meet standard operating process (SOP)
- Application can capture the location [lat/long or address] of an asset
- Capture asset picture before and after inspection for records, analysis, and training
- Inspection jobs displayed on the map to simplify the location tracking
- Remove the need for Data Entry as information is input directly at the source
- Barcode enabled, allowing new assets to be scanned and catalogued to inventory

Users

- Service Technicians
- Maintenance Personnel
- Field Engineers

Value Drivers

- 20% productivity gain due to fully automated process
- 10% higher issue resolution through images, location, and inspection results.
- A disruptive app, pre-packaged to expedite the implementation time, ROI realization, and reduction in TCO up to 80%.
- Completely scalable technology that grows with the business.
- Inspect assets quickly and correctly, getting the proper documentation without hassle
- End-to-end offline capabilities
- In app barcode scanner and signature capture capabilities
- Fully configurable, user friendly UI from the back-end.
- Multi-lingual capabilities
- Fully responsive with iOS, Android, Tablet, etc. out of the box

Industry

- Utilities (Power, Gas, Water)
- Public Sector
- Logistics
- Oil and Gas
